PROJECTS :

1) TeamCollab-College_Phase :

- Tools : HTML, CSS and JavaScript
- Team Size : 6
- Description : This project showcases a dedicated college student to create an engaging online platform for KLE Society’s Jagadguru Tontadarya College Gadag. Our project aims to serve both students and faculty with a user-friendly and informative interface.

2) Tin – Dog :

- Tools : Bootstrap
- Team Size : 1 (Individual Project)
- Description : Tindog is built using the Bootstrap framework, ensuring a responsive and visually appealing design across various devices. The website leverages the principles of user friendly interfaces to create a seamless and enjoyable experience for both dog owners and their four-legged companions.

3) Amazon – Clone :

- Tools : HTML & CSS
- Team Size : 1 (Individual Project)
- Description : Amazon Clone is a web development project that replicates the essential features and user interface of the popular e-commerce platform, Amazon. Using HTML and CSS this project aims to provide a simplified yet functional version of Amazon for learning and practice purpose.
